Education

Institute of Engineering and Technology, Lucknow

Lucknow, U.P., India

B.Tech. - Computer Science and Engineering | C.G.P.A. : 7.82/10

2023 – 2027

Work Experience

Flutter Developer Intern – Movison

Jun 2026 – Present

MoVison

Remote

- Optimized books catalog search via **server-side Firestore** filtering and **debounced search** with **StreamBuilder**-based real-time updates.
- Added **fuzzy search** for typo tolerance, improving search relevance and overall user experience.
- Built a structured **Help Center** with categorized FAQs (10+ categories) and an **issue escalation flow**, reducing support load.
- Implemented **single-device login enforcement** via device **UUIDs** synced across **Firestore** and local storage, and added **auto OTP read & autofill** to reduce login friction.

Freelance Flutter Developer – Serene Minds [\[Demo Video\]](#)

Dec 2025 – May 2026

Owlby (Mental Health Platform)

- Converted a **FlutterFlow** prototype into a production-ready Flutter app with **MVVM architecture** — separating UI, providers, and local database layers across feature-based folders.
- Built **offline-first** storage using **Sqflite** with versioned schema migrations; custom **Firebase Phone Auth** with OTP persisted via Provider and synced with backend **JWT** on login.
- Integrated multipart file upload for 1+ hour audio recordings via **REST APIs** with real-time status updates using **Provider** state management.

Projects

Feed App [\[GitHub Repository\]](#)

May 26

- Tech stack used:** Flutter, Riverpod, Supabase, REST API.
- Built a high-performance infinite-scroll feed with **Riverpod StateNotifier** and cursor-based pagination — GPU optimized using **RepaintBoundary**.
- Engineered RAM-efficient image loading using **cacheWidth** and a 3-tier image pipeline (thumbnail → 1080p → raw) to eliminate OOM crashes on heavy scroll.
- Implemented optimistic like UI with 800ms debounce, single **Supabase RPC** per interaction, and automatic server-state revert on failure.

URL Shortener API [\[GitHub Repository\]](#)

Mar 26

- Tech stack used:** Node.js, Express, PostgreSQL, Drizzle ORM, Docker.
- Built a secure REST API with **JWT**-based stateless auth, salt + SHA-256 password hashing, and **nanoid** for collision-resistant short code generation — zero plaintext credentials stored.
- Designed **PostgreSQL** schema with **Drizzle ORM** using UUID primary keys; containerized with Docker for one-command local setup.

Achievements

- Hacktoberfest Super Contributor 2025** [\[Post\]](#) – Recognized among **10,000+** global contributors for impactful and consistent open-source contributions.
- Open Source Contributions**
 - HordricWeather** [\[View PR\]](#) – Reduced release APK size by **67%** (75MB to 22MB) using ProGuard.
 - Hand-Sign-Cricket Game** [\[View PR\]](#) – Overhauled theme, typography, and animations.
- Solved **470+** problems on platforms like [LeetCode](#), [CodeChef](#), [GeeksforGeeks](#).
- Achieved a peak rating of **1505 on LeetCode** and **2★ (1454) on CodeChef**.
- Secured **3rd Place** in Cryptography Unlocked Hackathon (2024) among 50+ teams [\[Post\]](#) for a security-focused solution.

Skills Summary

Languages: C++, C, JavaScript, Dart, Python, SQL

Tools: Flutter, Node.js, Express.js, Riverpod, Provider, Bloc, Docker, Git, GitHub, Vercel, Jira

Databases: MongoDB, PostgreSQL, Supabase, Firebase

Technical Skills: Data Structures and Algorithms, OOP, Operating Systems, REST APIs, Database Design, Caching, Authentication & Authorization

Soft Skills: Problem Solving, Self-Learning, Communication, Team Collaboration
